DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 26-33 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 recites:

"A computer-readable medium having computer-executable instructions stored thereon to perform the steps of ..." and further recites "acquiring signals from one or more sensors", and "wirelessly transmitting a cue signal". However, a claim that embraces both a product (computer readable medium having computer executable instructions) and process (acquiring signals, and wirelessly transmitting a cue signal) is ambiguous and therefore does not particularly point out and distinctly claim subject matter.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 26-33 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Art Unit: 3662

Claim 26, which appears to attempt to embrace both product and process, is precluded by language in 35 USC 101, which sets forth statutory classes of invention in the alternative only.

Allowable Subject Matter

4. Claims 1-25 and 34-52 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter:

Independent claims 1 and 34 are considered allowable over the prior art of record by claiming an externally cued countermeasure system for vehicles wherein the countermeasure system located within the vehicle is cued from a surveillance system located external and spaced apart from the vehicle. The prior art of record is directed to internally cued countermeasure systems for vehicles.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3662

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
